

EcoRestore

Native Grass Seed

Australian native seed plus soil ameliorants

EcoRestore Native Grass Seed has been developed for the Council and Civil industry to remediate disturbed roadside and footpaths.

Product Description

EcoRestore is formulated to provide a mix of native grass species from the area identified on the bag. The seed has been ethically harvested and scientifically tested for germination and purity. The seed has been coated as a protection from germination due to insufficient moisture.

The formulation includes Zeolite, Calcium carbonate, beneficial soil biota and trace elements.
